Professional Summary

A passionate MERN Stack Developer with hands-on experience building and deploying scalable web applications using the MERN stack.

Projects

AI Content Generator (Next.js, TypeScript)

[GitHub](#) | [Live Demo](#)

- Architected and deployed a production-ready AI-powered content generation platform featuring 50+ templates for blogs, emails, and social media content.
- Integrated Google Gemini AI API for real-time content generation and implemented PostgreSQL schema with Drizzle ORM for type-safe database operations and content history management.
- Integrated Razorpay Subscriptions and Clerk Authentication for secure user management, automated billing, and real-time usage tracking across Free & Pro tiers.

ShopeEase - Integrated Shopping Platform (MERN Stack)

[GitHub](#) | [Live Demo](#)

- Engineered a full-featured shopping platform with authentication, secure payment integration, and an admin dashboard.
- Developed reusable React components, dynamic routing, and RESTful APIs using Express & MongoDB.
- Implemented role-based access control, advanced product filtering, and streamlined checkout process, resulting in improved UI responsiveness and enhanced user experience

Real Time Chat App (React.js, Firebase)

[GitHub](#) | [Live Demo](#)

- Designed and deployed a real-time messaging platform with Firebase Authentication and Firestore for instant communication.
- Integrated comprehensive features including private messaging, live chat rooms, file/image sharing, and user management controls.
- Implemented advanced functionality such as chat history management, user blocking capabilities, and secure data transmission protocols.

Education

Bachelor of Computer Application - IK Gujral Punjab Technical University, India

Aug 2023 - Present

- CGPA: 8.4/10 | Placement Coordinator | Relevant Coursework: DSA, DBMS, OOP, Software Engineering, OS, Networking, Cloud Computing.

Experience

Accenture Developer and Technology Job Simulation (Virtual)

June 2025

- Completed a real-world software engineering simulation focused on applying the Software Development Lifecycle (SDLC) and agile methodologies to practical business cases.
- Demonstrated problem-solving, critical thinking, and cross-functional collaboration by analyzing requirements, designing workflows, and delivering customer-focused solutions.

Skills

Languages: TypeScript, C++, Python, Java

Frameworks & Libraries: Next.js, Node.js, Express.js

Databases: MongoDB, Mongoose, PostgreSQL

Tools & Deployment: Git, GitHub, Render, Netlify, Vercel

APIs & Integrations: Gemini AI, JWT Authentication, Firebase Auth, Razorpay & Braintree Payment Integration
